

Title The Swiss Registries for interstitial and orphan lung diseases (SIOLD Registries)

Summary

The Swiss Registries for interstitial and orphan lung diseases (SIOLD Registries) are a national recruitment tool for clinical, genetic, translational and epidemiological research on rare lung disorders. Cases are reported by a network of more than 200 Swiss pulmonary physicians, including university hospitals and other centers of respiratory medicine. The SIOLD Registries are open for collaboration with national and international partners and institutions.
